**Help the Printers.**

A school should be established providing that all territorial, county and municipal officers have all the necessary printing of their offices done within the territory and by bone side printing establishments in the territory; why a county clerk or any other official should send to St. Louis or Chicago firms to have books made or printed stationery furnished for his office is not exactly clear, especially when the books can be made or the printed stationery furnished by printing and binding establishments within New Mexico; home institutions should be encouraged and certainly the newspapers of New

Mexico, who are doing a great and constant work for the advancement and upbuilding of New Mexico deserve and should have fair consideration at the hands of the present assembly. This is not a political question, as by the enactment of such a law printing establishmants, publishing papers of republican and democratic propensities will be enabled to strike and no public interest can possibly suffer. The members of the assembly who aid in having such an obviously fair and timely bill enacted into law will have the gratitude of the press and now a day's time is not a bad time to have the newspapermen on the side - New Mexican.

## THE GOLD FIELDS.

### The Rush Continues, Although Hardships are Being Experienced.

From a strictly reliable source THE CITIZEN learned yesterday that the rush to the San Juan gold placer fields continues, although great hardships are being experienced by many now on the ground. More than half of the 500 or more people that are now in the San Juan valley are without sufficient blankets, or even clothing, to keep themselves from suffering from intense cold weather, and it is claimed that if something is not done to keep back the rush, that there will be actual starvation among the panic stricken seekers after the precious metal. Of course there is gold in the San Juan valley, and so far as accounts have been received, but there is not enough to supply the horde of men now there or contemplating early trips. The Flagstaff Sun contains the following article:

**About the Indian School.**

In view of the recent events, investigating allegations of brutality in the treatment of Indian pupils at the Park Institute, which allegations have been reiterated in certain newspapers,

Flagstaff's ardent sought for evidence, placed in writing every available record, has spread to timber, New Mexico and California, and the far west has become embittered with the gold fever and parties from New York and the New England states are now on their way to the new Eldorado. Colorado has during past ten days added about 1000 miners to the number who have already started to the gold fields.

Misses John Marshall, Henry Banta, and L. M. House returned home Monday from the diggings and are enthusiastic over the prospects of the new field. They believe that the upper fields, which their claim are located, are richer than the locations of the Arizona & Utah Developing Company twenty-five miles from the mouth of the San Juan.

The upper locations are twenty-five miles up the river, and about ten miles below Buff City, Eagar, Mapache and Banta and other Flagstaff parties have located about twenty claims and fifty to sixty claims had been located there when the party left.

No gold - not even a specimen nugget was brought back by the parties returning.

The reason given is that the water comes in too fast and prevents working to any depth and it prevents them from getting down to bed rock, where the gold is supposed to be in quantities. The upper formation is sand, which is not strictly gold-bearing, and is of a yellowish nature. This sand is full of gold and it is claimed that every pan taken shows from 10 to three hundred colors, and varies in value from one cent to three dollars to the pan, and the prospects are that when the gravel near bed rock is reached that gold will be found in quantities that will repay the cost of mining it.

## THE PASTIME BOYS.

### The Quartette Singers Entertain Their Friends.

Not to be outdone by their white friends, the colored Pastime quartette composed of J. W. L. Craxton, bass, Miss Randall, baritone, W. H. Cather, tenor, and John H. Cornell, piano, gave a delightful ball to those red friends last evening at the Chas. Whiting building on Grand avenue.

During the day Miss Randall, who was engaged by the club to officiate as door manager, attended to all the necessary details by saving the floor thoroughly, securing the music and getting the states for heating the room comfortably.

These little details being attended to, at 8 o'clock Misses Rose and Blassie, the musicians, commenced playing for the grand march, and from that on until nearly twelve o'clock this evening the twenty-four couples that put in appearance enjoyed themselves immensely.

At 11 o'clock a good spread, consisting of turkey and chicken, with cranberry sauce and the various salads, was heartily enjoyed by the gay dancers.

Tom Berry and Tom Robinson were masters of ceremonies and Berry's voice was the loudest distinctly by all.

The girls' voice for some
